PROFESSIONAL SUMMARY

Full Stack Developer with hands-on professional experience gained through a 6-month full-stack internship at Hyperlink Infosystem, Ahmedabad, along with a short React-focused internship at AristoMax Technologies. Recently completed Master of Computer Applications (MCA). Skilled in React.js, Node.js, Express.js and MySQL/MongoDB, with practical exposure to REST APIs, authentication systems, e-commerce platforms and CRUD-driven applications.

EXPERIENCE

Software Engineer Intern — Hyperlink Infosystem, Ahmedabad

6 Months (Jan'26-July'26)

- Worked as a Full Stack Developer Fresher across Express.js, React.js and MySQL.
- Developed React.js applications using Hooks, Formik, Yup and Axios for form handling, validation and API integration.
- Built and maintained backend REST APIs using Node.js, Express.js and MySQL following MVC architecture, with JWT authentication and authorization.
- Worked with middleware, file uploads (Multer), Swagger API documentation and Postman for testing and debugging.

React Developer Intern — AristoMax Technologies Pvt. Ltd., Ahmedabad

2 Months (Jun'25-July'25)

- Built a React.js feature for a PDF viewer with semantic search, highlighting matched text in yellow for quick reference.
- Explored automation and analytics tooling, including n8n for workflow automation and Power BI for data visualization.

PROJECTS

Indeed Job Portal | React.js, Redux Toolkit, TanStack Query, Node.js, Express.js, MySQL | [GitHub](#)

- Built full-stack job portal with 21 REST APIs, featuring JWT authentication, forgot/reset password flow (Nodemailer), and AES encryption (crypto-js) on sensitive request/response bodies.
- Implemented live job feed with React Query and cached user data sync via React Query, reducing redundant API calls.
- Built dual-file upload system (Multer) for resume and cover letter, routed to separate storage paths with independent validation.
- Enforced two-layer validation — Joi (backend middleware) and Yup (frontend) — with Formik for form state, plus multi-language API responses via localizify.

eAuction Platform | React.js, Node.js, Express.js, Sequelize, MySQL | [GitHub](#)

- Built full-stack online auction platform with JWT authentication and separate admin and user dashboards for managing listings, bids, and payments.
- Developed an automated bid-processing engine handling live bid tracking, auto-bid logic, and interval-based price refresh.
- Implemented payment and transaction tracking with region/state/city hierarchy management, plus secure document upload (Multer) for bid-related files.

Saleh — E-Commerce Platform API | Node.js, Express, MySQL | [GitHub](#)

- Built a modular REST backend (Auth & User modules, layered Service/Controller/Repository/Validator structure) with JWT authentication and multi-language support (localizify).
- Designed a MySQL schema covering catalog, cart, orders, wishlist, payments, advertisements, discounts and banners; documented all endpoints with Swagger UI.

Car Booking Platform | React.js, Redux Toolkit, Node.js, Express.js, MySQL | [GitHub](#)

- Built full-stack car booking platform with role-based access for admin, user, and public views, using JWT authentication, bcrypt, and AES encryption (crypto-js).
- Developed car listing, booking, and admin management modules with multi-language API support (localizify).
